NEWS FLASH

Bird-Man Terrorizes Gotham City!

Hi, model-builders. Ace Reporter Tom Gilliland here. Bringing you the up to the moment facts about Oswald Cobblepot, A.K.A. THE PENGUIN!

The weeks of sludging through sewers and the freezing cold of Gotham City are over. I have finally compiled the necessary info to build and paint the new Horizon Models PENGUIN and one of his penguin henchmen warriors.

Lets begin by putting things together. First look over all of the kits contents and make sure you have all the parts. Your kit should contain the following:

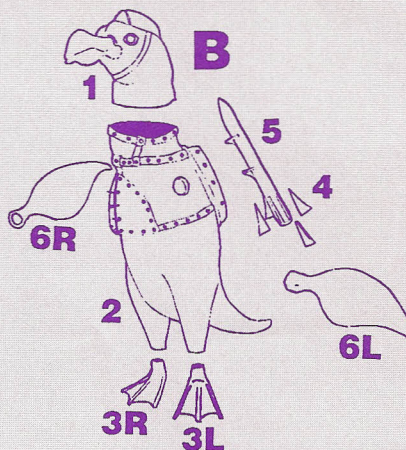

PENGUIN:

- #1: Main Body
- #2: Lower Torso
- #3: Right Arm
- #4: Left Arm
- #5: Hat

PENGUIN HENCHMEN:

- #1: Head
- #2: Main Body
- #3: Feet, Left and Right
- #4: Rocket Fins (4)
- #5: Rocket
- #6: Flippers, Left and Right

To trim the unwanted parts form your poly-vinyl model, heat the parts with a hair-dryer or in hot water. When they soften, use a sharp hobby knife to carefully cut away the unwanted sections while being careful not to cut yourself. When trimming part #1 of the PENGUIN, be sure to leave a small lip of poly vinyl under the front vest area. This will be necessary so that when you attach part #2 to part #1 there will be a sufficient surface for gluing. When all the parts have been trimmed you are ready to assemble your model. For a detailed look at how the parts fit together see diagram A and B. Remember to use a cyanoacrylate adhesive for assembly. Any gaps in your assembly and be filled with a modeling putty, carefully placed into any visible seams. For ease in painting your model, you may wish to leave the Lower Torso section and the completed rocket off, until painting is complete. Then assemble the finished parts to complete the kit.

PAINTING INSTRUCTIONS:

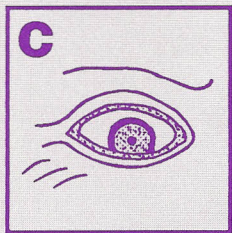

The first step towards a great paint job is a solid primer coat. This will make painting your kit easier and your paint job last longer.

To paint the PENGUIN begin with his face. Base coat the face with a LT. FLESH. Then dry brush with a LT. WHITE FLESH followed by a lighter dry-brushing of WHITE to the nose and cheeks. Then with a LT. PINK/FLESH wash, carefully deepen the shadows around the eyes, the mouth, the nose, and the outside edge of the face area. Add a DK. PINK/BURGUNDY color to the face wash and apply around the eyes coloring the eye socket area. With the same wash paint in the inside of the mouth.

Paint the PENGUIN's teeth TAN. Then with a DK. SEPIA wash deepen the area of tooth at the gum line and at the base of the teeth. This should produce a rather rotten looking set of teeth. Finish off his teeth by applying IVORY to just the top tip of each tooth.

The PENGUIN'S eyes should first be painted PINK/BURGUNDY. Then using IVORY fill in the eye area, leaving a small ring of the

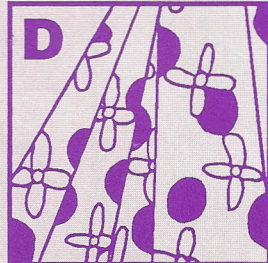

PINK/BURGUNDY around the edge of the eye. Using a DEEP RED wash, tint the IVORY area just slightly to create a bloodshot appearance. Using BLACK, paint in the center of the eye by applying a small round circle of paint. Finish off the eye by placing a small dot of DK. BROWN in the center of the BLACK circle and place a second small BLACK dot into the BROWN area. See diagram C for reference.

Now to paint the PENGUIN'S dashing wardrobe. First paint his shirt LT. GREY and drybrush with WHITE. the button on his shirt

should be painted GOLD and a dot of GLOSS BLACK placed in the center. His hat should be painted BLACK and drybrushed with CHARCOAL GREY, the hat band should be SEMI-GLOSS BLACK. His gloves are GLOSS BLACK.

The PENGUIN'S vest should be painted MED. GREY and drybrushed with SILVER. Then using small WHITE dots, create the spot pattern across the vests surface. The buttons on the vest are BRIGHT SILVER.

The neck-tie should be base-coated with BLACK and drybrushed with CHARCOAL GREY. Then using a MED. GREY, dot the tie with an irregular pattern. Using WHITE, apply small '+' signs in a sparse pattern over the tie and dot the center of each one with YELLOW. The tie tack should be painted BRIGHT SILVER. See diagram D for more reference.

Next paint the coat CHARCOAL GREY. Drybrush the coat with MED. GREY. To achieve a tweed look to the coat use a toothbrush or a short bristled paint brush and stipple on GREY, LT. GREY, and WHITE in an uneven pattern over the whole coat. Then paint the coat buttons and the fur coat collar BLACK. Drybrush the coat collar with a CHARCOAL GREY.

When the collar is finished paint the PENGUIN's hair BLACK and drybrush with DK. BROWN, MED. BROWN, and then a DK. TAN.

His pants should be base-coated

with MED. GREY and then drybrushed with a LT. GREY. The stripes on his pants are BLACK, and should be painted on with a small flat bristled brush. Begin the stripes at the top edge of the pants, starting with the front zipper, and work the stripe down the pant leg to the bottom. Repeat this step until you have covered the front half of the pants. the only part of the backside that will need stripes is the area just above the shoes.

The PENGUIN's shoes should be painted BLACK and drybrushed CHARCOAL GREY in the center, and SEMI GLOSS BLACK on the toes and heel. Gently drybrush the soles of his shoes with MED. BROWN.

The PENGUIN HENCHMEN can be painted in any BLACK on WHITE blotch style you choose. When your base blotch pattern is finished drybrush the BLACK areas with CHARCOAL GREY. The belts should be painted LT. GREY and the buckles and studs painted SILVER. The penguin's beak and feet should be a combination of BLACK, ORANGE/ YELLOW. and DK. GREY. The rockets are WHITE with RED barber pole stripes. the armor plates should be base coated BLACK and then drybrushed SILVER.

• For more reference information about the techniques discussed in the instructions, see the Vinyl Model Manual also included in your kit, or HORIZON Model Building Video "Explorations In Painting".
